

4+ Ordering, Counting & Sorting at Assessments

Children may be given a set of numbers to order. Provide opportunities to practise.

Children could be encouraged to count at an assessment. Take every opportunity to practise counting. Count the fruit in the bowl, the cars in a line, the shopping into the basket, laundry into the machine, steps from the door to the car and claps in a song.

Ordering items may be an assessment activity. Offer items at home that can be sorted by length, size, shape, colour and weight.
